FRONTEND DEVELOPER

Alexander Kislov

ABOUT ME

Last years I worked as a biotechnologist according to my university diploma. Several years ago I started learning Frontend web development, firstly by myself and then studying courses.
My skills include semantic, cross-browser, adaptive website coding by Figma and Photoshop templates.
In my work I use BEM methodology, SASS preprocessor, version control system, programming language Javascript and jQuery.
Now my studying is continuing, particularly JavaScript deeper learning.
In the future I pan to study React.
